Acadia

Video Touch Pad overlay

50 mm: measure this to check the print scale

Print at 100% (actual size, no fit to page) on matte card stock, about 200-250 g/m2.

Cut along the solid black lines; the art runs past them so a cut a little outside is fine.

No windows: the pad is pressed through the card. Slide it into the touch pad's slot.

For 1-player games on the Atari 800/XL/XE; the game finds the pad in port 2 by itself.

Two copies on the sheet, one spare.
