Acadia

Atari 5200 keypad overlay

50 mm: measure this to check the print scale

Print at 100% (actual size, no fit to page) on matte card stock, about 200-250 g/m2.

Cut along the solid black lines; the art runs past them so a cut a little outside is fine.

Cut out the 12 key windows with a craft knife, then slide the overlay into the controller.

Two copies, one for each controller. Top side button: helm a boat. Bottom: fire.

START: begin / total scores. PAUSE: pause. Hold # for the score pages, press again to step.
